

Automotive Supplier Competitiveness Improvement Program (ASCIP)

OCE Office use only

APPLICATION DATA	
Project Title	«Project_Title»
Application Number	«Application_Number»

1: CHALLENGE AND PROPOSED SOLUTION

- A. Briefly describe the company as it applies to the automotive supply industry.
- B. What is the specific challenge this project will address? Please describe how addressing this challenge will increase the company's competitiveness in local and global markets.
- C. What is the IT technology solution to be adopted/trained-on and how will it quantitatively and qualitatively address the challenge identified above?
- D. What are the comparative advantages of the proposed solution relative to existing practices? Please elaborate using evidence from previous trials, if available.

- A. (Type Here)
- B. (Type Here)
- C. (Type Here)
- D. (Type Here)

2: PROJECT PLAN & MANAGEMENT

- A. Referring to the Milestones Table, detail and justify the project plan and work breakdown structure – note key deliverables and outcomes.
- B. Describe the project's change management plan, detailing how the delivery team will actively support uptake of the solution by project partners and users. Include strategies for engaging all relevant stakeholders.
- C. What are the potential barriers and risks to implementing the proposed solution, and how will these risks be mitigated?

- A. (Type Here)
- B. (Type Here)
- C. (Types Here)

3: DELIVERY TEAM

- A. Further to the team table describe the expertise and roles of the project delivery team.
- B. Demonstrate the company's capacity to deliver similar projects and describe the company's track record; provide examples of relevant past activities and organizational success stories.

- A. (Type Here)
- B. (Type Here)

4: ANTICIPATED OUTCOMES

- A. Describe anticipated product lifecycle management advancements made through the proposed IT (software and hardware) adoption and/or training.
- B. Describe anticipated improvements to operational efficiency and competitiveness made through the proposed IT (software and hardware) adoption and/or training.
- C. List any and all specific gains in efficiency resulting from successful implementation of the solution.

- A. (Type Here)
- B. (Type Here)
- C. (Type Here)

ATTESTATIONS

I declare that:

- At least one of the applicant companies is a medium sized Ontario-based enterprise.
Note: *Medium sized is defined as a firm with either fewer than 500 employees globally or global revenues of less than \$1 billion).*
- At least 50 per cent of the applicant companies' total sales revenue comes from the auto supply sector.
- None of the applicant companies have previously received ASCIP funding.
